

Eagle Scout Service Project Report

BOY SCOUTS OF AMERICA®

Eagle Scout candidate's full legal name Noah Wienke

Eagle Scout Service Project Name NQW Wehr Eagle Project

Project start date 10/9/2026 **Project completion date** 10/10/2026

This report is to be prepared after your service project has been concluded. It is not necessary to provide lengthy answers. Be prepared to discuss your project and this report at your board of review.

Project Execution:

Once planning was completed, when did the work begin? 10/9/2026 When was it finished? 10/10/2026

Project Description

Please provide a brief description of your project and the impact it will have.

Approximately 150 feet of non-preexisting cedar split-rail fencing, installed along two trails at the Wehr Nature Center. The fencing design is chosen to dissuade visitors from entering restoration zones, while allowing park employees or volunteers to easily climb over. The fence is located between a trail and a lakeshore restoration zone, an area commonly damaged by visitors fishing in undesignated spaces. Preventing visitor damage while allowing employee access lets the flora grow naturally in its intended habitat.

Describe what you did after your proposal was approved to complete the planning of your project.

After my proposal was approved, I filled out the Fundraising Application and got the required signatures. After the fundraiser and donation from my troop, I had enough to pay for the lumber and placed the order. I created a signup form to see who was able to make the workday. I called the local Home Depot to ask a few questions about rental equipment, and placed the auger rental reservation online.

Observations

What went well?

Enough volunteers showed up, the materials were delivered on time, the weather was great for doing manual labor outside, and we finished construction earlier than expected. While I did run over budget, it was less than I expected and was able to cover it.

What was challenging?

It was a challenge to organize the project, during which I made a few decisions that led to tighter deadlines for myself. There was a short time where it seemed like the supplies wouldn't be delivered on schedule, which would have forced a last minute rescheduling. While I was able to stay organized, there were some times I should have moved faster and looked ahead, such as getting my proposal and fundraising applications approved sooner.

Changes

Many successful projects require changes from the original proposal. What significant changes did you make and why did you make them (be brief)?

There were only two changes from the original plan. There is an old, disconnected phone line that the park doesn't know exactly where it is buried. It ran near where the fence would've connected to the existing fencing, so the two posts planned to be there were installed on a different trail. When digging the last hole for the fence, we actually found another section of that old line. We were told to leave it and fill the hole back in, so the last rail goes at an angle into the ground rather than an endpost.

Leadership

In what ways did you demonstrate leadership?

I demonstrated leadership through communication. This includes contacting the beneficiary to make sure the fence was planned and built properly. It included making sure people knew when and where to be on the workday, and in one case reaching out by calling a volunteer who slept through their alarm. I directed the volunteers on where we were working, and how to start. I made sure people were aware of the safety requirements, such as only allowing adults to operate power tools, and to use gloves and safety glasses. It was also important to allow people who knew what they were doing to work without being unduly bothered or micromanaged. When decisions or unexpected circumstances arose, I made those decisions.

What was most difficult about being the leader?

Keeping track of where everyone who was helping with construction was. The work area was about a quarter mile from the parking lot where our supplies were. Sometimes people would stop to use the bathroom or get something from their car without telling anyone, causing some confusion.

What was most rewarding about being the leader?

The most rewarding part about being the leader was when the construction was over and approved by the beneficiary. It was a relief that after several months of work and a number of sceduling conflicts, I was able to organize enough people and materials to make the project happen.

What did you learn about leadership, or how were your leadership skills further developed?

Most of all, I learned that I didn't have to do everything myself. I'm not used to delegating tasks or asking for help with projects, but for this it was necessary in order to complete the project. I also used and improved my skill of adapting quickly to issues when they come up.

Materials, Supplies, Tools, Other

Were there significant shortages or overages of materials, supplies, tools, and other? If so, what effect did this have?

We had two extra endposts and five extra rails. The Wehr Center accepted them as supplies to repair their fences in the event of future damage.

We actually had an overage of volunteers at one point, so I sent two of them to re-woodchip a trail. (This was offered as an optional task by the beneficiary if we had a surplus of volunteers.) Their work was appreciated by the beneficiary and helped keep the trail maintained.

Entering Service Project Data

The BSA collects information on the hours worked on Eagle Scout service projects* because it points to achievement of our citizenship aim. To assist with the data collection, please refer to your list of people who helped and the number of hours they worked. Then please provide the information requested below. Include hours spent doing planning under Total Hours Worked.

Be sure to include yourself, and the time spent on planning.

	Number of Workers	Total Hours Worked
The Eagle Scout Candidate - Planning Hours	1	7:05
The Eagle Scout Candidate - Execution Hours	1	7:10
Registered BSA youth members	4	19:25
Other youth (brothers, sisters, friends, etc., who are not BSA members)	1	7:30
Registered BSA adult Scouting volunteers and leaders	5	26:25
Other adults (parents, grandparents, etc., who are not BSA members)	3	9:40
Grand Total of Hours (enter here and on your Eagle Scout Rank Application)	15	77:15

***There is no requirement for a minimum number of hours that must be worked on an Eagle Scout service project**.
If you have been told you must meet a minimum number of hours then you may lodge a complaint with your district or council. If you have given leadership to an otherwise worthy project and are turned down by your board of review solely because of a lack of hours, you should appeal the decision.

Funding Summary

Describe how you obtained money, materials, supplies, and other needs (including donations) for your project.

Since our troop is dissolving, I was able to get $650 saved from our fundraisers. I also did a fundraiser with my nearby Culver's, which earned $300.

I recieved $200 as a donation from VFW Post 10394, and $100 from the Hawthorne Garden Club.

I purchased the fencing material from Bliffert Lumber for $910.80, rented an auger from the Home Depot for $172.93, spent $220.06 on a Domino's Pizza order, and $44.67 at Pick n Save for drinks and ice.

Tools and gasoline were brought by myself and several volunteers, as well as some supplied by the Wehr Center.

How much was collected? $1250

How much was spent? $1348.46

If your expenses exceeded funds available, explain why this happened, and how excess expenses were paid.

I made a mistake ordering pizza from Domino's. I paid out of pocket for the extra.

If you had money left over at the end of your project, did you turn it over to the project beneficiary? If "No," when will that be done, or if your beneficiary is not allowed to accept the left over funds, which charity will receive them?

No money was left over.

How were the donors thanked?

As of writing this, they have not been sent, but I am creating thank-you cards to send or give to the donors. I also thanked them verbally (or in one case, over email) when I met with them.

Photos and Other Documentation

If you have them, submit photographs taken before, during and after project completion on a separate document. You may physically attach letters, maps, handouts, printed materials, or similar items that might be helpful to your board of review.

Caution: Using an Adobe or other PDF reader to insert a "signature" can cause this entire document's contents to be locked preventing future edits; make sure you save a copy if any signatures will be inserted digitally.

Candidate's Promise *Sign below before you seek the other approvals.*

On my honor, I was the leader of my Eagle Scout service project and executed it as reported here

Signature Date

Approvals

In my opinion, this Eagle Scout service project meets Eagle Scout requirement 5, as stated on page 3 of this workbook.
